

Seeing Jesus

Leader: tape a piece of paper over the tiny solution graphic in the lower right corner, or don't copy it when making copies.

This picture was taken by a Chinese photographer of whom it was said he was deeply troubled. The picture he took was of melting snow with black earth showing through. When he developed it, he was amazed to see in it the face of Christ, full of tenderness and love. It led him to become a Christian."

The picture below can be turned for the best way to see Jesus. Jesus is rather large in it. Some can see Jesus, others need help. Some need time, some see him instantly. Some need to see him in a certain way, others see him no matter how they look at him. Once you see him, you always know he's there. Read the Road to Emmaus Story. Luke 24:13 How do we "see" or come to "understand" Jesus?
